

Automated Sprinkler System and Mobile App using IoT

- Shariar Hasan
- ID: 18701012
- Session: 2017-18
- Supervised by:
- Dr. Muhammad Sanaullah Chowdhury
- Department of Computer Science & Engineering
- University of Chittagong

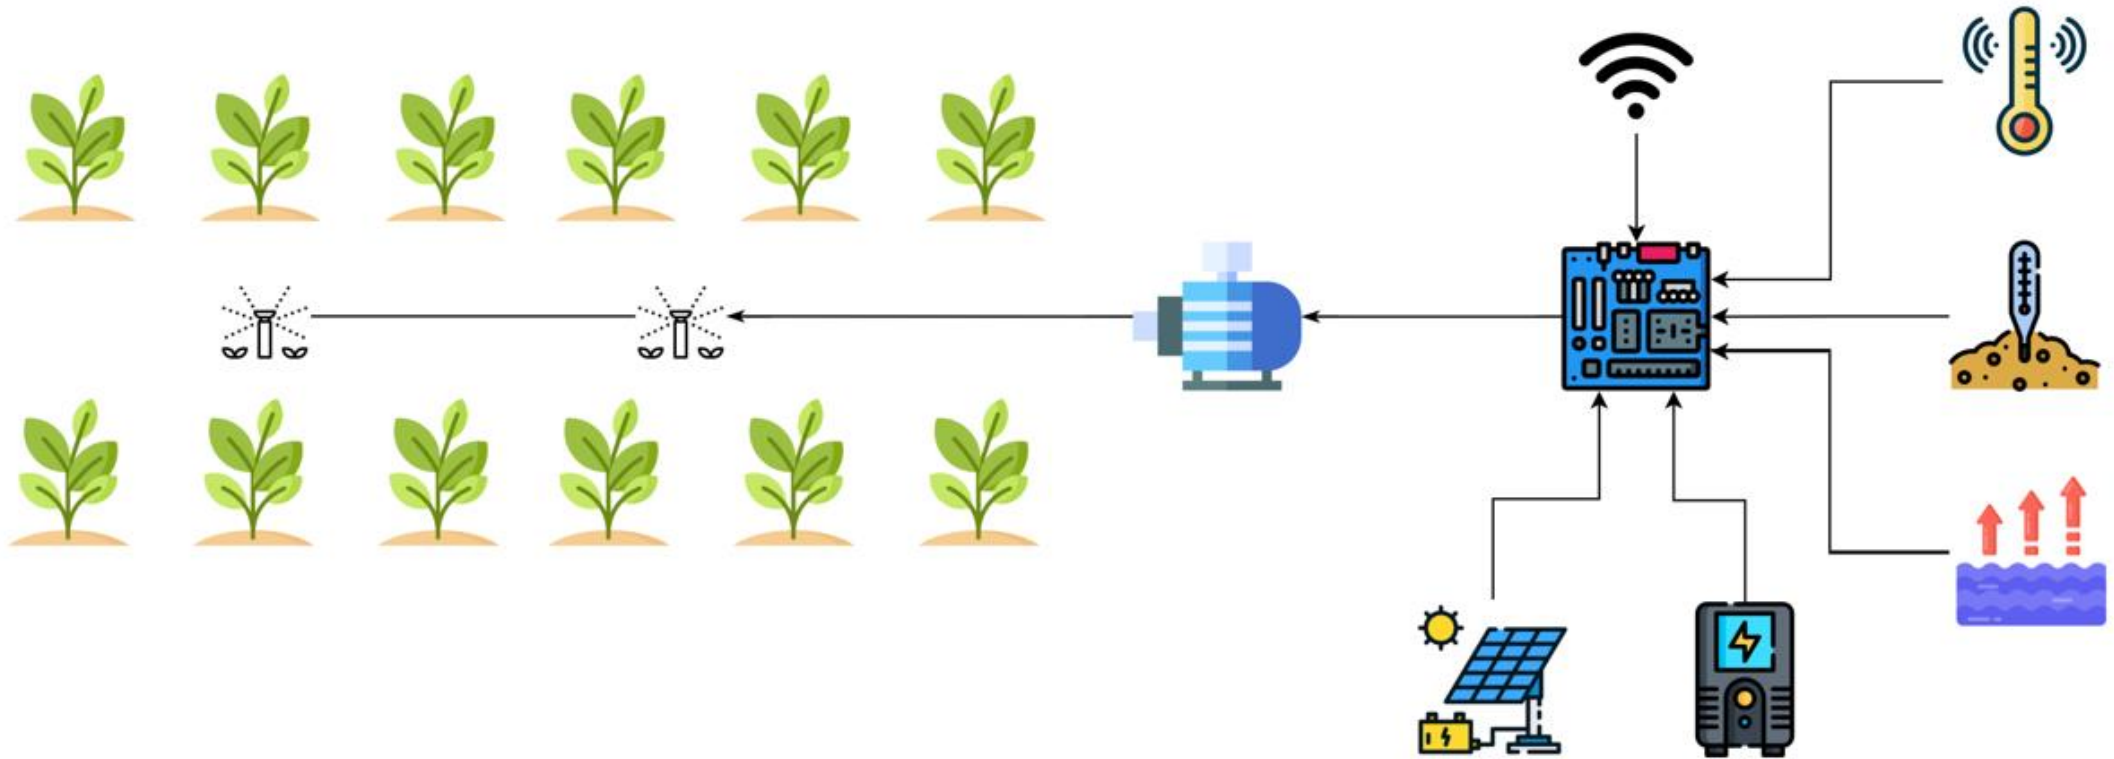

Problem Statement

- Reduce the overuse of water in gardening
- Take decision according to Rain or Humidity
- Determine the ability of soil to plant multiple species of plant in a single land

Progress

- Methodology
- Current Work
- Future Target

Methodology

Current Work

- Working on the circuit of the whole proccess
- Building the mobile app

Future Target

- Complete the whole circuit
- Complete the mobile app

Thank YOU
