

## Crossbar.io API Namespaces, Licenses and Usages

### Any WAMP AP compliant router (incl. Crossbar.io Community and Crossbar.io Fabric)

	<i>API Namespace</i>	<i>License</i>	<i>Usage</i>
Application Level	wamp.	free and open	WAMP meta API as defined in the WAMP RFC.
Management Level	n.a.	n.a.	Management APIs are out-of-scope of the WAMP spec.

### Crossbar.io Community

	<i>API Namespace</i>	<i>License</i>	<i>Usage</i>
Application Level	crossbar-wamp.	proprietary, no-changes, but free license	Extensions to the WAMP meta API specific to Crossbar.io
Management Level	crossbar.	„no-direct, internal-only“ license	Used internally within Crossbar.io (and with CFC)

### Crossbar.io Fabric

	<i>API Namespace</i>	<i>License</i>	<i>Usage</i>
Application Level	crossbarfabric-wamp.	commercial only	Extensions to the WAMP meta API specific to Crossbar.io Fabric
Management Level	crossbarfabric.	„no-direct, internal-only“ license	Used internally within Crossbar.io Fabric (and with CFC)

### Crossbar.io Fabric Center

	<i>API Namespace</i>	<i>License</i>	<i>Usage</i>
Application Level	crossbarfabriccenter.	commercial only	Public API of Crossbar.io Fabric Center.
Management Level	n.a.	n.a.	Non-existing (logically).

#### Notes:

Any user/customer code should only use „application level“ namespaces in below.

Any user/customer code is (technically) disallowed to register or publish to URIs with prefixes „wamp“ or „crossbar“.
