

New in version 2.2:

- * Redrew all glyphs with regular cubic contours, leading to smaller filesize
- * Added of, and and the discretionary ligatures (Œ 'dlig')

New in version 2.3:

- * Added ə and Ə (schwa's). Example sentence from Azerbaijani Wikipedia:

Ərəb dili tarixən üç inkişaf mərhələsi keçmişdir

ƏRƏB DİLİ TARİXƏN ÜÇ İNKİŞAF MƏRHƏLƏSİ ...

- * Added kerning for all caps, and substituted spaces for bigger ones in all caps. Example:

THIS IS CHOMSKY VERSION 2.3 ALL CAPS KERNING

This font was never designed for all caps use, and such use remains recommended against, but won't look as bad now.

- * Some capital letters now shorter to match their peers. Examples: K, V, W, X.
