

# SolSource 3-in-1

A cooking, heating, and electricity solution for 2.5 billion of the world's poorest people.

At a price they can all afford.

Cooking

Heating

Electricity

The SolSource 3-in-1 is a lightweight and portable energy solution. Its core component is a high-powered, foldable solar concentrator that harnesses the sun's energy. Alone, this concentrator provides clean cooking. Two additional modules provide heating and electricity generating abilities. This device has been widely recognized for its innovation by such prestigious awards as: the 500,000 Euro 2010 Green Challenge Award, U.S. EPA's People, Prosperity & the Planet Award, MIT's IDEAS and \$100K Social Entrepreneurship Competitions, the Muhammad Yunus Innovation Award, and the Lemelson Foundation's International Technology Award.

## PRODUCT INFORMATION

- Weighs 6 kg
- Cooks in 10 minutes to 1.5 hours
- Takes less than 5 minutes to set-up
- 80-96% specular reflectivity
- Portable
- Foldable
- High-powered
- Zero pollution
- Easy maintenance and repair
- Flexible retail and sales options
- Add-on heating and electricity modules
