

Briquette Technology

An Eco-Friendly Energy Option for the Poor

Why Use Briquettes?

- You save money - it is cheaper to use briquettes than charcoal
- You cook for free when you make your own briquettes
- You can grill/roast, boil or fry food with less fuel
- Briquettes produce less smoke than 3-stone fires
- Using briquettes guarantees better hygiene and cleaner kitchens
- You can make money from selling waste materials for making briquettes, by producing and selling briquettes and by buying and selling briquettes
- Briquettes mean less rubbish in our environment
- Both women and men can make briquettes

For more information about the technology contact Practical Action Eastern Africa Regional Office
