# Know Your Chotukool

## Know Your Chotukool

Chotukool is a 35L solid state electronic cooling device that uses no compressor or refrigerant.

Chotukool is suitable for cooling vegetables, fruits, food items, etc.

It operates on 110-240V AC main supply or 12V DC supply. Works on inverter also.

It is just 7.3 kg in weight and easy to move.

It keeps daily need food fresh and cools maximum of 28°C under the ambient temperature.

It opens from top – maximum utilization of space and retains cooling better.

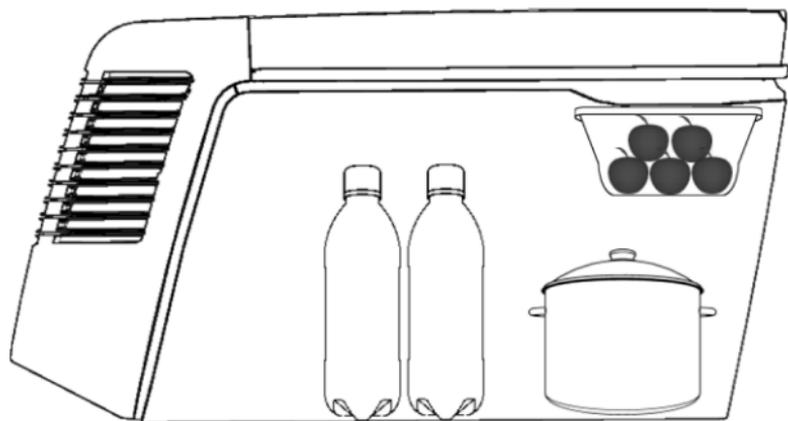

Chotukool is not a refrigerator, it is expected to cool but not freeze the content.

Cooling system is CFC-free, fan cooled thermoelectric cooling.

# Intended Usage

## Domestic Usage

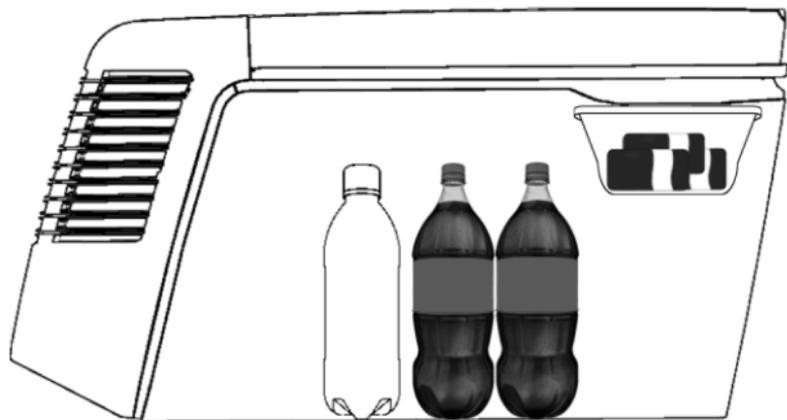

For daily cooling needs to store vegetables, fruits, food items, water, etc.

# Intended Usage

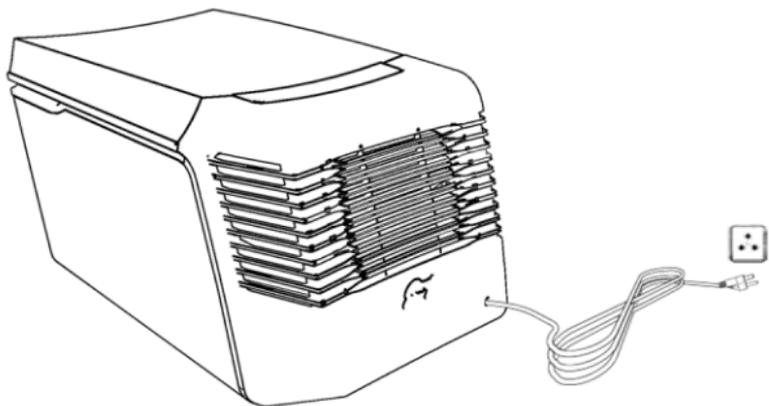

## Commercial Usage

For small commercial outlets & food stores to store and cool beverages, water bottles, chocolates, etc.

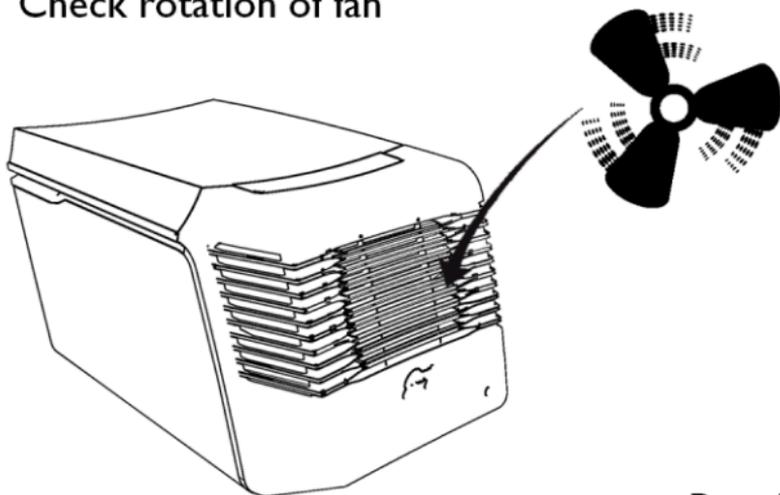

# Installation Guide

1. Plug the AC cord to mains supply

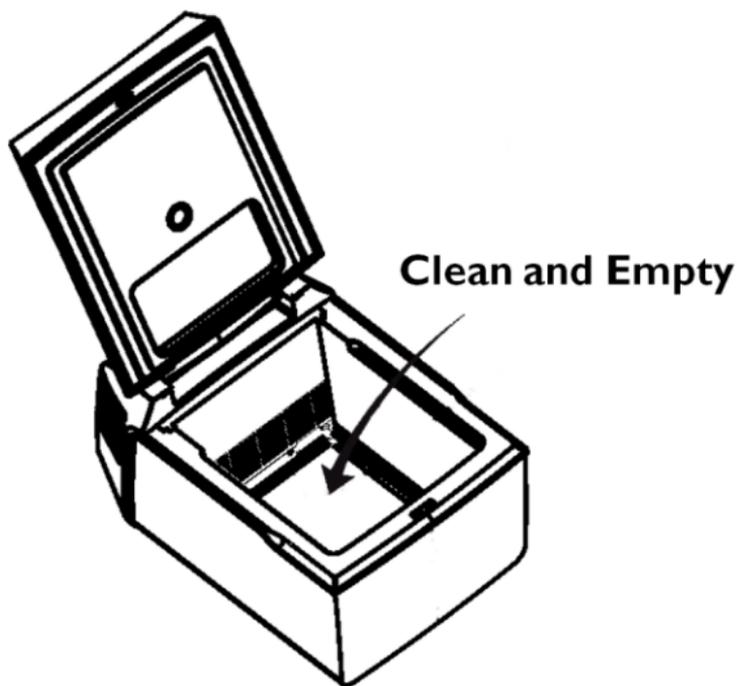

2. Check rotation of fan

## Installation Guide

3. Clean the insides with a damp cloth.
4. Run Chotukool empty for 4 – 5 hours before use.

# Usage Tips

## General

When starting, Chotukool takes 4 - 5 hrs to attain cooling temperature; it is advised to keep it on for 4 - 5 hrs before use.

Before starting your Chotukool for the first time, you should clean it from inside with a damp cloth for hygienic reasons.

Place Chotukool on a firm base.

If you wish to switch Chotukool off, first switch off the main supply and unplug the connection supply.

## Usage Tips

### Cleaning and Maintenance

Before cleaning the Chotukool, remove the cable out of the socket.

Do not clean the Chotukool under running water.

Do not use abrasive cleaning agents or hard objects during cleaning as these can damage the product.

Keep the device clean from inside with the help of damp cloth.

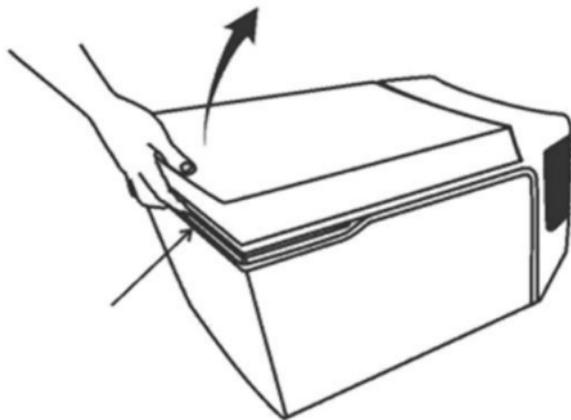

It is normal for water to condense inside, this demonstrates normal functioning.

There is a provision of foam strip to absorb the condensed water, the same should be squeezed, dried and put back weekly (See alongside image).

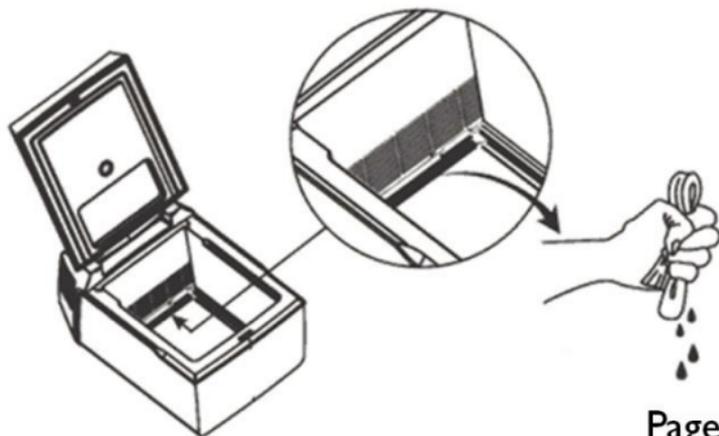

# Usage Tips

## Cleaning and Maintenance

1. Open the Chotukool with the help of recessed handle

2. Squeeze water collection foam band to remove drain water

## Usage Tips

### Energy Saving

Choose a well ventilated installation location which is protected against direct sunlight.

Avoid placing hot food in Chotukool. Allow warm food to cool down to room temperature first, before placing it inside.

Do not open the cooling device more often than necessary.

Do not leave the lid or door open for longer time than necessary.

It is advised not to place food items which are required to be stored at freezing temperature in Chotukool.

## Usage Tips

### Caution!

Please check the storage temperature requirements of medicine before placing it in the Chotukool.

The cooling device is not suitable for transporting caustic materials or materials containing solvents.

# Safety Instructions

## General Safety

Ensure that the air intake area (cowl) is not covered.

The cooling system of your Chotukool should only be opened by qualified personnel.

Incorrect / Faulty repairs can lead to considerable hazards.

Do not allow children and inexperienced elders to operate it without supervision.

Food should be stored in its original packing or in suitable containers.

Chotukool should be connected to main power supply, 110 - 240V AC or 12V DC, with connection cable provided along with it.

# Safety Instructions

## General Safety

If the connection cable is damaged, it must be replaced with the cable of the same type and specifications.

Please approach authorized service personnel for replacement.

Do not operate the device if it is visibly damaged.

The connection cable should be removed from the power supply before cleaning and maintenance or after use.

# Safety Instructions

## Safe Device Operation

Before starting the device, ensure that the power supply line and the plug are dry.

Protect Chotukool and power supply unit from naked flames or other heat sources such as heaters, direct sunlight, gas, ovens, etc.

Ensure at all times that there is sufficient ventilation so that the heat that arises during operation does not build up.

Make sure that the device is sufficiently far away from walls and other objects for better air circulation.

Please ensure that water does not enter the air intake area (Cowl).

Avoid filling the inner container with ice or fluid and use suitable container for the same.

# Safety Instructions

## Safe Device Operation

Do not immerse the device in water or clean it under running water or expose it to rain, as it may damage the cooling system of device.

Do not operate the device with exposed or damaged cables and it is advised to replace it immediately.

Take special precaution if the wire is naked and don't touch it with your bare hands. This especially applies when the device is operating with an AC mains power supply. This may lead to fatal injuries.

Godrej cannot be held liable for damage resulting from improper usage or incorrect operation.

# Troubleshooting

<b>Fault</b>	<b>Possible Cause</b>	<b>Solution</b>
Your cooler does not function (Plug is inserted & switched on)	No voltage present in the AC voltage socket	Try using plug socket.
	The fan or the cooling element is defective. Defective electronic chip. Defective power	This can only be repaired by an authorized customer services unit.

## Technical Specifications

Gross Capacity	35 L
Connection Voltage	230V AC / 50 Hz or 12V DC
Power Consumption	62 W
Cooling Capacity	28°C drop from ambient temperature
Weight	7.3 Kg
Dimensions (W x D x H)	736 x 431 x 383 (in mm)
